

GB7CIP FBB Forwarding Routes Personal Mail

**gb7cip.ampr.org gb7cip.#32.gbr.euro Forwarding Routes
Located Surrey England UK
(16 Miles (25Km) South of London) [IO91WH]**

All Incoming Bulletins from overseas are held and either manually or automatically inspected.

7PLUS files are deleted, unless sent from very trusted stations. In practice most are deleted. We have had some indecent image files forwarded to gb7cip that should never have been sent over any Amateur Radio Mail Forwarding Network in the past.

Updated 9 November 2018

All forwarding is based on H Hierarchical address selection. Constantly under review as needs arise.

Forwarding is carried via Radio over VHF UHF using NetRom AX25 TCPIP, HF PACTOR, HF PACKET or the Internet via AXIP AXUDP and TCPIP tunnels.

G4APL is always looking for new HF PACTOR forwarding partners or new forwarding partners to different parts of the world, that are NOT detailed in this document.

If you want to link to Caterham GBR GB7CIP. Please contact Paul G4APL.

GB7CIP WhitePage Database

If you run a White Pages (WP) database you may send your WP Updates to SP WP@GB7CIP.#32.GBR.EURO GB7CIP WhitePages database.

If you use LinFBB it's just a simple case of amending to your fbb.conf file and add GB7CIP to at the end of your wpcalls list entry.

e.g. wpcalls = GB7CIP

This will be automatically be called during the overnight maintenance at 02:00hrs

If a non FBB system (We have got one BPQ system to play ball)

Set-up your system to send WP Update message addressed as

SP WP@GB7CIP.#32.GBR.EURO

Subject WP Update

Message body will contain the WP Update data generated by your WP server running on your system if enabled.

Note all messages sent as SB WP@WW EU* etc are automatically deleted and not accepted at GB7CIP as these are invalid.

GB7CIP FBB Forwarding Routes Personal Mail

SP MAIL PATH CHECKING TO AND FROM GB7CIP PING SERVER

You can test your forwarding path for Personal AX25 Mail to and from GB7CIP from any AX25 BBS by sending a message addressed as shown below.

```
SP PING@GB7CIP.#32.GBR.EURO
Subject AX25 Mail SP Path test
Message Body Any comment.
```

There is no excuse for SP Personal Mail not to reach it's destination BBS. (if the BBS is active and alive).

```
All it just needs SysOP's liaising within each
H Area.   County.State.Country.Continent
          H Region.Country.Continent
```

More Hierarchical Address (HA) information can be found detailed on the following website <http://www.theskywaves.net/fbbuser.html>

If you do not get a reply from GB7CIP's ping Server.
Liaise with Paul G4APL.

So that end to end diagnostic path forwarding tests can be carried out between your system and GB7CIP.

Linfbbs xfbbs ping server was written by g0lgs
