

GB7CIP FBB Forwarding Routes Personal Mail

gb7cip.ampr.org gb7cip.#32.gbr.euro Forwarding Routes
Located Surrey England UK
(16 Miles (25Km) South of London) [IO91WH]

All Incoming Bulletins from overseas are held and manually inspected.

7PLUS files are deleted, unless sent from very trusted stations.
In practice most are deleted as we have had some indecent image files
forwarded to gb7cip that should never have been sent over any
Amateur Radio Mail Forwarding Network in the past.

Updated 27 January 2017

All forwarding is based on H Hierarchical address selection.
Constantly under review as needs arise.

Forwarding is carried via Radio over VHF UHF using NetRom AX25 TCPIP,
HF PACTOR or the Internet via AXIP AXUDP and TCPIP.

G4APL is always looking for new HF PACTOR forwarding partners.
If you want to link to Caterham GBR GB7CIP please contact Paul G4APL.

You can test your forwarding path for personal AX25 Mail to and from
GB7CIP from any AX25 BBS by sending a message addressed
SP PING @ GB7CIP.#32.GBR.EURO.

There is no excuse for SP Personal Mail not to reach it's destination
BBS. (if the BBS is active and alive). All it just needs SysOP liaising
within each H Area. County. State. Country. Continent
H Region. Country. Continent

Linfbb xfb ping server was written by g0lgs
