DG2GAJ design

(Updated Mar 05)

Boom length 230mm Size 3x8x230mm  
 Rod diameter 2-3mm 0.65m length  
 Mid frequency 1297 MHz.  
 Gain over Dipole 8.5 dB  
 Beam width 51° (-3dB)

---

In DG2GAJs design it is not clear, but he shows 2 lines (Alt 186) for the dipole. I assume that this could indicate a folded dipole! These are used in other designs to get the Z right.

Why don't U send an interesting bulletin?
